

RDUP Accepted Products List

The Rural Development Utilities Program (RDUP, formerly RUS), a division of the U.S. Department of Agriculture, offers loans and grants in order to increase the rate of deployment of technology to small towns in rural areas. RDUP acceptance allows service providers to purchase Charles Industries products with these funds. The products are listed in the "List of Materials Acceptable for Use on Telecommunications Systems of RDUP Borrowers." The complete list of products can be found on www.usda.gov/rus/telecom/index.htm.
