

SoftStart™

NEW!

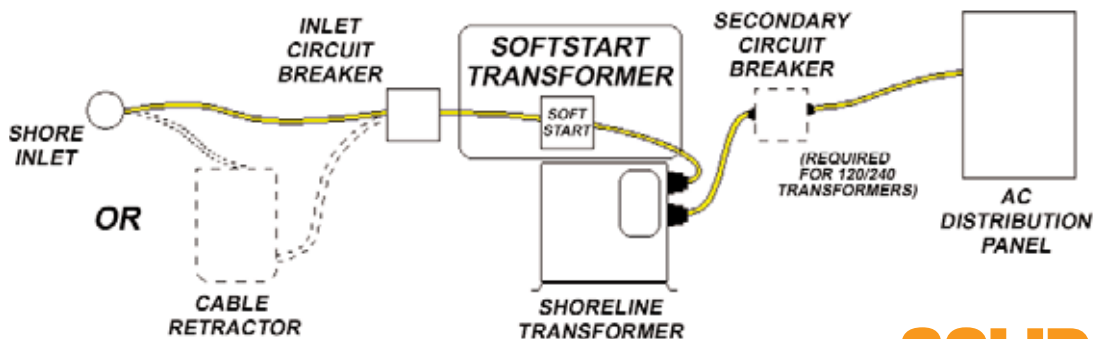

The SoftStart is a device designed to be installed on a boat's incoming AC shorepower, limiting the "inrush" of AC current to a shoreline transformer, eliminating the "nuisance" breaker trip when first powering-up a vessel.

FEATURES

- Two models available - 120vac or 240vac
- Rated 50Hz or 60Hz
- Can be used with any 50 amp transformer
- Rugged high-quality construction
- Fully automatic operation
- Dimensions: 6.76" H x 8" W x 4.5" D
- Weight: 4.15 lbs.
- **Made in the U.S.A.**

The SoftStart is designed to be installed just prior to the shoreline transformer on the vessel.

**SOLID
POWER**

PRODUCT NUMBER	DESCRIPTION
93-XFMRSOFT-A	120vac applications
93-XFMRSOFTi-A	240vac applications
