

OSP Wire Terminal Housings

Durable Housings for Copper Pair Termination Points

Charles OSP Wire Terminal Housings offer a simple, compact solution for termination points at single and multi-unit dwellings. Thermoplastic construction and rubber grommets for dropwire cable entry create a housing capable of protecting terminations from the elements, insects and impact. A sturdy, self-hinged lid provides convenient entry to internal terminal and grounding posts. Housings may be wall or pole-mounted using wood screws. Wire Terminal Housings may also be used for inside applications as a protector base or merely as a wire terminal block.

Product Features

- Available in 1, 2 and 6-pair wire terminals
- Hinged lid for convenience and retention
- Lid has detent to hold it in a hands-free open position
- Self-extinguishing thermoplastic material, rated UL94V-0
- Embossed "TELEPHONE" identification mark on outside of lid
- Bevelled washers allow trouble-free wire terminations
- High center ground boss provides easy entrance of ground wire
- Overlap design of the lid and rubber grommet in the base ensures excellent weatherability
- Plated terminals provide corrosion-resistant ground wire termination
- Terminals mount easily on poles, residence walls using two #10 wood screws
- Ideally suited for use with Charles Industries' 12-119 Series building risers
