

Expanded-capacity, environmentally-protected OSP closures designed to house copper, fiber and CATV equipment

Charles Multi-Purpose Housings (CMPH) are versatile OSP closures designed for both new provisioning installations as well as rehabilitation of existing access points house in metallic enclosures. The CMPH's superior structural strength, outstanding environmental protection and ease of installation combine to create a long-life housing that reduces operational expenses.

The CMPH assembly features a lift-off dome and corrugated channel base. The lift-off dome allows 360° access to internal working areas with access via recessed hex head lock(s) using a 216 Tool or Can Wrench. The dome provides "bell jar" flood protection, eliminates intrusion of wind-blown rain and dust, and prevents unauthorized entry. The base provides ample room for entry of multiple large cables, including conduit. A spacious bottom entry allows technicians to easily slide the base over existing large cable rehabilitation applications.

CMPH enclosures are available with multiple internal bracket configurations for copper, fiber, and copper/fiber installations, as well as empty (no bracket) and custom bracket configurations for unique deployment situations. Ground and bonding hardware is included.

Charles Multi-Purpose Housings

FEATURES

- BEAD/BABAA compliant product
- Structurally rugged, non-metallic outer housing construction offers dent resistance, corrosion protection, electric shock safety and positive alignment in opening and closing
- A corrugated channel base design provides secure footing in all in-plant installations, allows installation with or without the use of mounting stakes, and prevents frost heave
- In rehabilitation installations, existing stakes can be utilized for placement
- The one-piece dome (two-piece on 8500 series) locks securely onto the base creating a "bell-jar" effect that protects internal components in flood-prone areas
- The lift-off dome provides full 360° access to internal splicing area

APPLICATIONS

- New installations
- Rehabilitation of metallic OSP closures
- Fiber optic splice closure protection
- Cable slack storage
- Cell site deployments

Product Outline Dimensions - CMPH 4500 Series

All dimensions are in inches

Usable Splice Volume (Approx.): 7,400 cu. in.

CMPH-4500N Copper Configuration

CMPH-450FN Fiber Configuration

CMPH 9500 Series - Extended Height 3-Piece Assembly

CMPH-950DFNCU

CMPH Field Installations
