

Bright safety cap greatly increases pedestal visibility in high vegetation and snow, helping prevent accidental damage

The High-Visibility Pedlock Kap is a plastic cap designed to snap on to a 6", 8", 10" or 12" Charles Pedlock buried cable-ready access closure. These caps are molded from a HDPE polyethylene material with a high-visibility orange color, ultraviolet (UV) inhibitors and impact modifiers added into the material.

The high-visibility orange color enhances the visibility of a Pedlock pedestal installed in areas of high vegetation or grass growth or where deep snowfall occurs. Enhanced visibility reduces the risk of damage during right-of-way maintenance by allowing crews a brighter, differentiated target for easier avoidance.

Hi-Viz Kaps are available for 6", 8", 10" and 12" Pedlock Pedestals

FEATURES

- Molded in high-visibility orange color
- UV resistant
- Impact resistant
- Easily snaps on to an arched Pedlock Dome
- Tamper resistant
- Molded of long-lasting HDPE polyethylene
- Chemical resistant
- Other colors upon request
