Access & Transmission Products Manufacture Discontinued (MD) Notification

PRODUCTS AFFECTED:

This notice impacts selected products in the **STS 3192 Span Termination System** Product Family.

BACKGROUND:

Charles has supported an extensive line of telecommunications products for many years. We have worked diligently to control product costs and when possible, pass those savings on to our customers. In addition, we have managed to maintain product support and price levels in the face of limited component availability, escalating product costs, and a decline in overall market usage of these products. It is for these reasons that these Access and Transmission products will now be manufacture discontinued (MD).

EFFECTIVE DATES:

Effective immediately, Charles will have manufacture discontinued the products listed in Appendix A, page 2, of this notification.

SUPPORT:

Technical Support and repair services for Manufacture Discontinued will continue to be provided beyond the MD date for products under warranty.

NOTIFICATIONS:

A communications package will be sent via e-mail to distribution partners and direct customers by April 28, 2017. Contracted Customers will be treated in accordance with the terms set forth in their respective Agreements. All recipients of this notification are requested to return an enclosed 'NOTIFICATION OF RECEIPT'.

ORDERING/INFORMATION:

Should you have any questions regarding this bulletin, please contact your Charles Inside Sales Representative directly, or phone 847-806-6300.

Access & Transmission Products Manufacture Discontinued (MD) and Additions and Maintenance (A&M) Notification

PRODUCTS AFFECTED:

This notice impacts selected products in the **360 Channel Bank, APS, D448 Channel Bank, HVDL, Transmission and Signaling, T1, and T1 STS** product families.

BACKGROUND:

Charles has supported an extensive line of telecommunications products for many years. We have worked diligently to control product costs and when possible, pass those savings on to our customers. In addition, we have managed to maintain product support and price levels in the face of limited component availability, escalating product costs, and a decline in overall market usage of these products. It is for these reasons that selected Access and Transmission products will now be manufacture discontinued (MD) or have limited availability with an Additions and Maintenance (A&M) designation.

MANUFACTURE DISCONTINUED (MD):

As is standard practice, Charles regularly reviews product offerings and makes adjustments based upon raw material/component availability and market demand. Appendix A, page 2, of this notification lists those products which will be manufacture discontinued (MD).

EFFECTIVE DATES:

Effective July 1, 2016, Charles will have manufacture discontinued the products listed in this notification and will have limited availability of the products identified in the latest Price List. Prior to this date, available products may be purchased in accordance with our standard ordering procedures. Orders received after this date will be filled while supplies last.

SUPPORT:

Technical support and repair services for Manufacture Discontinued will continue to be provided beyond the MD date for products under warranty.

NOTIFICATIONS:

A communications package will be sent via e-mail to distribution partners and direct customers by April 29, 2016. Contracted Customers will be treated in accordance with the terms set forth in their respective Agreements. All recipients of this notification are requested to return an enclosed 'NOTIFICATION OF RECEIPT'.

ORDERING/INFORMATION:

To place orders or should you have any questions regarding this bulletin, please contact your Charles Inside Sales Representative directly, or phone 847-258-8526.
