

Charles Industries' non-metallic Non-Louvered Vertical Pedestals provide ease of installation and maintenance along with robust protection for fiber terminals and passive CATV/broadband components in below grade outside plant cable environments. The pedestals are made of UV stabilized high impact resistance HDPE. Each pedestal comes with a 52 inch mounting stake that is equipped with slotted holes and offers easy installation of hardware and equipment. In addition, a variety of optional brackets are available for mounting specific hardware. During installation, simply bury the pedestal base to the desired depth and backfill. The pedestal has been designed for stability and mitigates pull-over. The pedestals come with a variety of self-locking dome options to address specific security requirements.

B04 Pedestal

FEATURES

- BEAD/BABAA compliant product
- Secure and robust for all weather conditions with high-impact resistant UV stabilized material
- Multiple lock, bracket and color options to satisfy customer requirements
- Craft-friendly one-piece dome comes with self-latching lock that slides easily into secure locking position, creating a flood-resistant interior space
- All hardware and bracket options are constructed of aluminum and stainless steel for sturdiness
- 360° access and rectangular shape provide increased workable area
