

Amphenol Charles Industries (ACI) Fiber Drop Repair Closures (FDRC) are very compact units. They can be used as a repair closure or a small splice closure for a single fiber cable. There are two in-line ports that can accommodate cables or micro-duct up to 7.5mm in diameter as well as commonly used 8 x 4.5mm flat drop cable.

The units have two internal splice slots and can accommodate up to 4 single fusion splices. They feature grommet sealing and can be re-entered and re-sealed. The closures can be direct buried as well as placed in a hand-hole, mounted on a wall, or on an aerial strand.

FDRC

FEATURES

- Compact size: 7" x 4.6" x 0.9"
