1. GENERAL INTRODUCTION

1.1. Document Purpose

This document provides general information for the 97-002498-A retrofit kit for the SH60-482420 series radio shroud. Figure 1 shows the kit components. Hardware is not shown.

Hereafter, the Charles 97-002498-A retrofit kit will be referred to as the "kit." The SH60-482420 series radio shroud will be referred to as the "SHRD60."

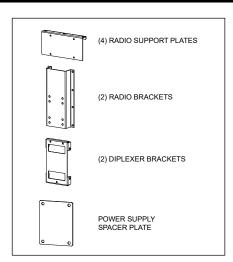

Figure 1 Kit Components

1.2. Product Purpose

The kit includes a set of brackets to install in the SHRD60. The new brackets support Ericsson 4890 and 4490 radios, one Ericsson 6308 power supply, and two CommScope CBC1923-DS-43 diplexers.

2. INSTALLATION

2.1. Inspecting the Product

The kit is shipped in a carton. Unpack the unit and dispose of the packaging material.

-INSPECTION NOTE-

Visually inspect the unit for damages prior to installation. If the equipment was damaged in transit, immediately report the extent of the damage to the transportation company.

2.2. Obtaining Tools and Equipment

Obtain the following recommended or needed items for installing the kit.

- Protective and/or insulated work gloves
- Safety glasses
- Any exterior cable strain relief, per company practice
- Slotted, hex, and Phillips screwdrivers
- Torque wrench
- Can wrench (216 tool)

2.3. Mounting the Kit

In all images in this section, the SHRD60 doors are hidden for clarity.

Unless otherwise specified, all hardware mentioned in this section is supplied with the kit, or is removed from the SHRD60 prior to installation.

2.3.1. Torque Requirements

Torque all hardware as shown below (unless otherwise noted). These values apply to SAE Grade 1 & 2 Low Carbon Steel, ASTM A307 Low Carbon Steel, and Stainless Steel Grade 18-8.

Thread Size	In-lbs	Ft-lbs
4-40	4±10%	
6-32	8±10%	
8-32	16±10%	
10-32	26±10%	
12-24	50±10%	
1/4-20/M6	60±5%	5±5%
5/16-18	125±5%	10.4±5%
3/8-16	180±5%	15.0±5%
1/2-13	500±2%	41.7±2%
5/8-11	1000±1%	83.3±1%

2.3.2. Preparing the SHRD60

Remove all equipment from the SHRD60. Remove the radio brackets, but leave the bracket support arms in place in the upper half of the SHRD60. Also leave the bracket assembly in the lower half.

Figure 2 shows the SHRD60 ready for the kit installation. Store or discard the removed equipment and brackets per company practice. Keep the bracket hardware, as some will be repurposed for use with the kit.

2.3.3. Drill Holes in Bracket Assembly

The diplexers must be mounted onto the plates on the right and left sides of the bracket assembly in the lower half of the SHRD60. The power supply gets mounted onto the front plate.

Prior to installing the kit, drill holes into the side-facing plates as shown in Figure 3. The image shows the right facing side plate; dimensions are the same for the left-facing plate. The power supply plate does not require drilling.

- 1. Drill three Ø0.25" mounting holes for the diplexer. Dimensions are shown in Figure 3.
- Apply touch-up paint to all holes to prevent corrosion.
 Allow paint to dry before mounting equipment.

2.3.4. Mount Diplexers

Remove the front panel from the bracket assembly in the lower half of the SHRD60. Save the four mounting screws.

Attach the diplexer brackets to the inner right and left surfaces of the bracket assembly using three 10-32 Phillips screws per bracket (Figure 4). Mount the diplexers onto the diplexer brackets using customer supplied hardware.

2.3.5. Mount Power Supply

Mount the power supply onto the front surface of the bracket assembly, with the spacer plate in between the power supply and the front plate (Figure 5). Use customer supplied hardware.

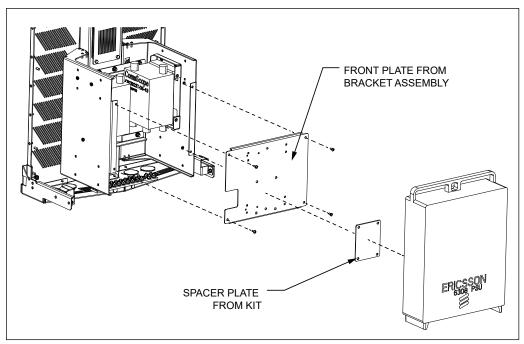

Figure 5 Mount Power Supplies

2.3.6. Mount Radios

The SHRD60 has two support arms in the upper half of the central spine. The radios and radio support brackets are mounted onto these arms.

1. Locate the two radio brackets. Each bracket has two sets of mounting holes. The upper row in each set is used for the Ericsson 4490 radio. The lower row in each set is for the Ericsson 4890 (Figure 6). Attach the radios to the radio brackets using customer supplied hardware (Figure 7).

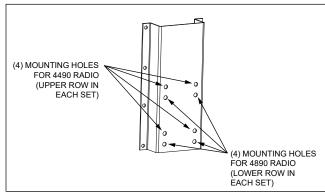

Figure 6 Radio Mounting Brackets

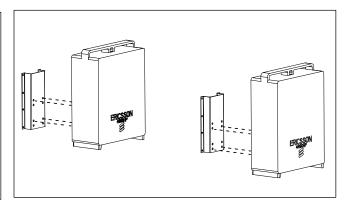

Figure 7 Attach Radios to Brackets

Page 4 of 5 2nd Printing

- Attach each radio bracket to the threaded studs on two support brackets (Figure 9). Use four 1/4-20 Keps nuts with flat washers per support bracket.
- 3. Mount the support brackets onto the support arms in the SHRD60 (Figure 9). Secure each plate with three 1/4-20 hex bolts, three lock washers, and three flat washers reserved from removing components from the SHRD60's original configuration.

The complete installation is shown in Figure 10.

4. WARRANTY & CUSTOMER SERVICE

Charles Industries LLC offers a one-year warranty on the kit product. The Charles warranty is limited to the operation of the kit hardware as described in this documentation and does not cover equipment that may be integrated by a third party. The terms and conditions applicable to any specific sale of product shall be defined in the resulting sales contract. For questions on warranty or other customer service assistance, contact your Charles Customer Service Representative.
